

Municipal Class Environmental Assessment Study Glen Lawson Road / Third Line from the Acton Urban Boundary to Fourth Line

STUDY BACKGROUND

The Glen Lawson Road / Third Line corridor currently serves as a connection between south Acton and Fourth Line. Increased traffic volumes along this corridor reinforces the need to consider improvements.

This study will assess current and future transportation demand and develop and evaluate suitable alternative solutions to safely and efficiently accommodate traffic along this corridor. Alternative solutions that may be considered include Glen Lawson Road / Third Line intersection improvements and/or new alignments from the Acton Urban Boundary to Fourth Line.

STUDY AREA

STUDY PROCESS

The Town of Halton Hills has identified the need to undertake a Schedule C Municipal Class Environmental Assessment (MCEA) study, as outlined in the Municipal Engineers Association MCEA (October 2000, as amended in 2007 and 2011). The study process will include the development and evaluation of suitable alternative solutions. Following this, a preferred solution will be selected to safely and efficiently accommodate various modes of transportation along the Glen Lawson Road / Third Line corridor.

STAKEHOLDER CONSULTATION

Stakeholder consultation is a key component of this study. The project team is committed to meaningfully engaging stakeholders, including review agencies and members of the public in identifying a preferred solution. Consultation with various stakeholders will occur throughout the duration of the study. The following formal consultation opportunities are planned:

Stakeholder Group Meetings (3) and Technical Agencies Committee Meetings (3) → June, September and November 2015
Public Meetings (2) → September and December 2015

The project team will present pertinent study information and findings, obtain input, and address various comments and concerns through the various consultation opportunities.

FEEDBACK

We are interested in hearing any comments or concerns that you may have about this study. Please contact either of the following project team members if you have any questions or comments, wish to obtain more information regarding the study, or be added to the study mailing list:
