

## Town of Halton Hills

# Active Transportation Master Plan

### Notice of Commencement and Open House #1

## ABOUT

The Town of Halton Hills is developing an Active Transportation Master Plan (ATMP) to encourage residents and visitors to walk, bike, and become more active as they live, work and play within the community. The ATMP will aim to:

1. Develop a network of continuous and connected routes made up of on and off-road facilities that prioritize safety and consider a range of users;
2. Strengthen the Town's integrated transportation system to achieve the benefits of multi-modal travel and accommodate the first-last mile active travel;
3. Accommodate varying trip types and purposes by linking key destinations such as schools, community centres and future mobility hubs; and
4. Address barriers to active transportation such as trucking routes, topography, missing links, and environmental features.

## PROCESS & ENGAGEMENT

As part of the project the Town will be hosting several consultation and engagement activities and opportunities including but not limited to:

A project website where we will provide key project information e.g. consultation summaries and reports as well as educational information about active transportation in Halton Hills. Visit the project page at [letstalkhaltonhills.ca](http://letstalkhaltonhills.ca)

An online survey which will be hosted on the project website where you can mark up maps, identify active transportation priorities and review and ranking various design options and alternatives.

Public open house sessions as well as pop-ups throughout the community to discuss the project with residents and stakeholders.

Workshop sessions with key agencies and stakeholders to review project outcomes and recommendations.

As part of the launch of the Active Transportation Master Plan we will be hosting an initial "meet and greet" session to present some of our initial findings and recommendations. The project team members will be available to answer questions and receive feedback.

**Please join us on May 1, 2019 between 7 and 9 p.m., at the MoldMasters Sportsplex in the Alcott Room.**
